MANVITHA BUDIDHA

+91 8639414175 | manvithabudidha@gmail.com | Portfolio | LinkedIn | GitHub | LeetCode | CodeChef

Summary

B.Tech Information Technology student with hands-on experience building full-stack applications, backend REST APIs, and algorithm-driven systems. Proficient in Python, Java, React.js, Node.js, and PostgreSQL. Demonstrated ability to ship production-ready projects end-to-end from database design to deployment. Seeking a Software Engineering internship to contribute to scalable backend systems and real-world product development.

Education

G. Narayanamma Institute of Technology and Science — **Hyderabad, India**
B.Tech in Information Technology — *2024 – 2028*
– Current CGPA: **9.38 / 10**

Sri Guru Junior College — **Hyderabad, India**
Intermediate (MPC) — *2022 – 2024*
– Percentage: **98.2%**

New Vision High School — **Suryapet, India**
Secondary School Certificate (SSC) — *2022*
– CGPA: **10 / 10**

Technical Skills

Languages:	Python, Java, C, SQL, JavaScript, HTML/CSS
Frameworks & Libraries:	React.js, Node.js, Express.js, FastAPI, Flutter
Databases & Tools:	PostgreSQL, Redis, Firebase, Git, GitHub, REST APIs
Core CS:	Data Structures & Algorithms, OOP, DBMS

Projects

SmartRoute – Delivery Route Optimization / *React, Node.js, Express.js, PostgreSQL,Prisma* Live | GitHub 2026

- Built a full-stack delivery route optimization platform using React, Node.js, Express.js, and PostgreSQL, implementing REST APIs for warehouse, vehicle, driver, and delivery management.
- Implemented a capacity-aware greedy nearest-neighbor algorithm using the Haversine formula to assign delivery orders to vehicles, with route-distance and estimated-duration calculations.
- Optimized route assignment by comparing the greedy approach against a randomized baseline and identifying unassigned orders based on vehicle capacity constraints.

MediAssure – Healthcare Mobile App / *Flutter, Firebase Auth, Firestore, FCM* GitHub 2026

- Built a cross-platform (Android/iOS) medication management app with a Firestore-backed schema storing per-user schedules, dosages, and refill thresholds; enforced data isolation via Firebase Auth UID-scoped security rules.
- Integrated Firebase Cloud Messaging (FCM) to deliver push notifications 15 minutes before each dose.

StyleSpeak – AI Outfit Recommendation System / *Python, FastAPI, React.js, Gemini API* GitHub 2026

- Built a full-stack outfit recommendation app with a React.js frontend and FastAPI backend, integrating Gemini API to generate constraint-aware style suggestions based on user inputs (occasion, budget, weather).
- Designed REST endpoints routing structured prompts to Gemini API and returning parsed recommendations with reasoning traces to the frontend.

Technical Programs

- **Google × Kaggle – 5-Day AI Agents Intensive Program** Participated in a hands-on program covering AI agent development, Google ADK, Gemini, tool calling, MCP, multi-agent systems, and agent evaluation.

Achievements

- **Laxmi Charities Academic Excellence Scholarship:** Awarded a four-year scholarship of **INR 50,000** annually in recognition of academic excellence..
- **Adobe Hackathon:** Advanced to Round 2; shortlisted from 2,00,000+ participants nationwide.
- **CipherCop National Hackathon – 3rd Runner-Up:** Secured 3rd Runner-Up, shortlisted among 500+ participants in a national-level cybersecurity hackathon.
- **FlowZint Hackathon:** Developed and submitted StyleSpeak, an AI-powered outfit recommendation system.
- **Competitive Programming:** Solved 300+ problems across LeetCode and CodeChef covering arrays, trees, graphs, dynamic programming, and binary search.
