Education

G. Narayanamma Institute of Technology and Science

Hyderabad, India

B.Tech in Information Technology

2024 – 2028

– CGPA: **9.39** / **10.0**

Sri Guru Junior College

Hyderabad, India

Intermediate (MPC)

2022 – 2024

– Percentage: **98.2%**

New Vision High School

Suryapet, India

Secondary School Certificate (SSC)

2022

– CGPA: **10.0** / **10.0**

Experience

Capabl

Remote

Software Development Intern | Python, FastAPI, Render

Jun 2024 – Aug 2024

- Architected and deployed **AcadeBot**, a conversational AI assistant for student event management, using a FastAPI backend integrated with an LLM API, serving responses via REST endpoints; live at smart-timetable-2-0qeh.onrender.com.
- Built a schedule-tracking module that parses and stores structured event records (title, date, time, location, type), supporting personalized reminders and timed notifications delivered via webhook callbacks.
- Designed the end-to-end system independently: defined API contracts, implemented request/response models using Pydantic, and configured continuous deployment on Render from a GitHub repository.

Projects

MediAssure | Flutter, Dart, Firebase Auth, Firestore, FCM | [GitHub](#)

- Built a cross-platform (Android/iOS) medication management app in Flutter with a Firestore-backed data model storing per-user medication schedules, dosages, and refill thresholds across 50+ active users.
- Implemented Firebase Authentication (email/password) for user identity and scoped Firestore security rules to enforce per-user data isolation.
- Integrated Firebase Cloud Messaging (FCM) to schedule push notifications triggered 15 minutes before each dose time, reducing missed-dose events by approximately 40%.

Coding Progress Tracker | Python, FastAPI, asyncio, SQLite/PostgreSQL | [GitHub](#)

- Built a REST API with FastAPI and async route handlers (asyncio + uvicorn) exposing endpoints for logging solved problems, querying streak data, and aggregating per-topic statistics across 300+ tracked problems.
- Designed a normalized database schema in SQLite (dev) / PostgreSQL (prod) with tables for users, problems, topics, and daily submissions; queries return under 50 ms average response time via indexed lookups.

Technical Skills

Languages: Python, Java, C, SQL, Dart, HTML/CSS, JavaScript

Backend: FastAPI, Node.js, REST API design, Pydantic, asyncio, uvicorn

Frontend / Mobile: Flutter, React.js

Databases: Firestore (NoSQL), SQLite, PostgreSQL

Tools & Platforms: Git, GitHub, Firebase (Auth, Firestore, FCM), Render, VS Code

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Architecture

Achievements & Certifications

Indeathon Hackathon – Winner (GNITS): Built and presented an agentic AI system, placing first among competing teams at an institute-level hackathon on the theme of Agentic AI.

CipherCop National Hackathon – Finalist: Advanced to the national finals out of 200+ competing teams.

Competitive Programming: Solved 300+ problems on LeetCode and CodingBat covering arrays, trees, graphs, dynamic programming, and binary search; LeetCode handle: [manvithaa_01](#).

Certifications: Google Kaggle – Agentic AI (5-day); IBM – AI Cybersecurity Fundamentals; Google – AI Essentials.
